

WOODS ME-SERIES

MID-MOUNT ZERO-TURN RIDING MOWER

Woods introduces the new ME-Series commercial zero-turn mower—loaded with all the power, performance, and quality you've come to expect from Woods.

A vertical-shaft engine transfers power to the cutting blades for a forceful, clean, uniform cut. It's designed with a low center-of-gravity for greater stability and traction on slopes. The flip-up footrest and seat make it easy to reach belts, spindles, hydraulics, and electrical components. You can easily change the 1.5 - 4.5-inch cutting height from the contoured, adjustable operator's seat.

Built to withstand long, hard hours of work, you can mow all day with a 12-gallon fuel capacity. The full-float, commercial deck features two layers of 10-gauge steel, with 7-gauge reinforcement, and a 7-gauge steel skirt.

The ME-Series from Woods—a premium commercial mower at a surprisingly affordable price.

Woods model ME2052B

WOODS ME-SERIES

KEY FEATURES
